

SAS 100

Shower and Commode Wheelchair

SAS 100

Introduction

SAS100 is a multipurpose shower and commode wheelchair meant to be your long term companion.

With a medical-grade stainless steel 304 material frame, it's designed specially for commode and shower purposes and built with material that lasts and functions like no other. The 7 level of height adjustability makes it flexible enough to match the various bed and commode heights that reduces your worries of not visiting new places due to hygiene issues. With the Flip-up armrests, all-wheel locking & roll-over commode feature, the wheelchair adds the advantage of reduced wheelchair transfers for hygiene activities. Adding comfort and peacefulness for caregivers too.

The top-seat helps it to be used as a regular wheelchair for home. With the weight capacity of 120 kg for users, SAS100 is an ideal companion for a person who is looking for a shower, commode and transport wheelchair in one.
